

## Join the TARGET Microwave Research Society

- >> Amplify your voice
- >> Broaden your knowledge
- >> Connect to research excellence

*“The TARGET Microwave Research Society is a unique opportunity for researchers to improve our visibility. It helps us in realizing our strategic goals and communicating with research policy makers.”*

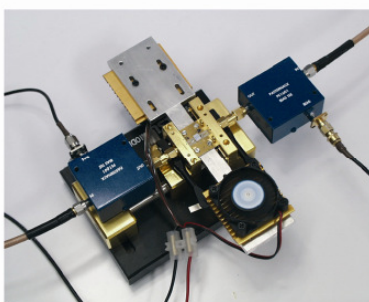

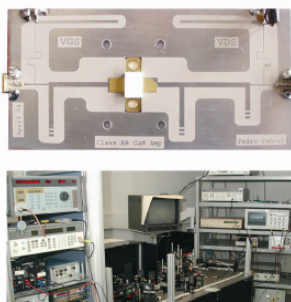

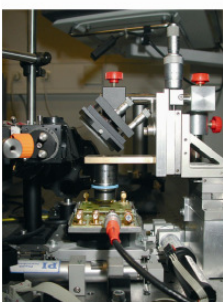

*Prof. Gottfried Magerl, Vienna University of Technology*

*“For us as an industry member, easy access to top researchers in all areas of microwave research has proven a major benefit.”*

*Jean-Marie Boulay, Freescale*

The TARGET Microwave Research Society is the association of European researchers and in the areas of amplifier and microwave research. Its members include universities, industry, high-tech companies, and research labs as well as individuals from all over Europe.

The TARGET Microwave Research Society is a non-profit organization that aims at advancing research and technical development in the fields of microwaves, amplifiers, semiconductor systems, telecommunications, and information technology.

## >> Member benefits

Members of TARGET benefit from strategic support, professional knowledge exchange, and numerous networking opportunities on a personal and institutional level. The Society is dedicated to communicating the research interests of its members at EU level and improving the visibility of microwave and amplifier research needs of the members.

TARGET members benefit from networking and participation in European projects. The Society also acts as a broker to inform industry about competent researchers in highly specialized topics, for example in the area of measurement and characterization services.

The TARGET Microwave Research Society trainings, workshops, and seminars inform about new directions of research and offer ample opportunities for networking.

## >> Membership

Universities, research institutes, labs and industry can join the society as corporate members. A member has full voting rights in the Society and can actively participate in the lobbying activities. Individuals of corporate members have access to the Society's seminars and events.

## >> Annual membership fees

Industry corporate members	€ 5,000
Universities and non-profit research centres	€ 3,000
